MEMORANDUM FOR: Chief, Employees Activities Branch

SUBJECT : Suggestion Award #69-223

Pursuant to your transmittal dated 8 May 1969 requesting an evaluation of the suggestion pertaining to "a more efficient Communications System," this is to advise that IOS requirements in the foreseeable future do not encompass or envision such a sophisticated means of communications. The telephone and the TWX facilities provide more than adequate means of communications between Headquarters and the Field Offices. We would therefore be hard put to attempt to apply the suggested system to our current or even projected communications needs.

25X1A9a

Deputy Director of Security (IOS)
